

Rockfield Streetscape Project

Phase 1

The project will construct raised landscaped medians and parkway landscape improvements, to provide traffic calming and enhance the visual aesthetics of this corridor. The final Phase 1 design of this project is complete from Rockfield Boulevard between Los Alisos Boulevard and El Toro Road. The City was approved for \$500,000 in Transportation Enhancement Activities Grant (TE) funds for this project. These federal grant funds require an environmental and engineering review by Caltrans and the Federal Highway Administration. Caltrans completed its review process May 2011 and authorized the City to begin soliciting bids for construction. The project is currently bidding with the bid opening scheduled for July 28, 2011.
